

Fungicide Resistance Management Strategies
Developed by the CropLife Australia Fungicide Resistance Management Review Group
 Valid as at 7 June 2017

Crop(s): Passionfruit

Pest(s): *Alternaria* sp.

Resistance Management Strategy for:

Group 2 (Dicarboximide); and
Group 11 (Quinone outside Inhibitors) fungicides

1. Maintain a protective cover with a protectant fungicide such as mancozeb.
2. Limit the use of **Group 2** to strategic periods, i.e. before, during and after extended wet periods.
 Always tank mix the Group 2 fungicide with a protectant such as mancozeb.
DO NOT apply more than four **Group 2** sprays in a season.
3. The total number of **Group 11** sprays should be no more than one-third of the total number of fungicide sprays per season.

DO NOT apply more than two consecutive applications of a **Group 11** spray.
 If two consecutive applications of a **Group 11** spray are applied, they must be followed by at least the same number of sprays from an alternative chemical group.
