

17. SPECIFIC GUIDELINES FOR GROUP Z HERBICIDES

GROUP	Z	HERBICIDE
-------	---	-----------

Moderate resistance risk

Globally herbicide resistance to the Group Z herbicide mode of action has been confirmed and documented in 5 weed species across 4 countries.

Group Z resistance exists in Australia in more than 200 populations of wild oats resistant to flumetralin. Many of these flumetralin resistant wild oats also show cross resistance to Group A herbicides. There is also endothal resistance confirmed in annual poa (winter grass).

To assist in delaying the onset of resistance, rotate with herbicides from other modes of action.

Consider using alternative methods of weed control to reduce weed numbers before applying herbicides. These may include summer crop rotations, delayed sowing to control wild oats with a knockdown herbicide, higher seeding rates, brown manuring to stop seed set, etc.

All the above recommendations should be read in conjunction with the [Integrated Weed Management \(IWM\) strategies](#)

CHEMICAL FAMILY	ACTIVE CONSTITUENT (FIRST REGISTERED TRADE NAME)
GROUP Z	Herbicides with unknown and probably diverse sites of action
<i>Arylamino propionic acids:</i>	flumetralin (Mataven L [®])
<i>Dicarboxylic acids:</i>	endothal (Endothal [®])
<i>Organoarsenicals:</i>	DSMA (disodium methylarsonate) (Methar [®] , Trinoc ^{®*}), MSMA (monosodium methylarsonate) (Daconate [®])

* ***This product contains more than one active constituent***

List of chemical families, approved active constituents and, in parenthesis, the trade name of the first registered product or successor. Refer to the APVMA website (www.apvma.gov.au) to obtain a complete list of registered products from the PUBCRIS database.

This strategy is a guide only and does not endorse particular products, groups of products or cultural methods in terms of their performance. Always follow the product label for specific use instructions. While all effort has been taken with the information supplied in this document no responsibility, actual or implied, is taken for the day to day accuracy of product or active constituent specific information. Readers should check with the Australian regulator's (APVMA) product data base for contemporary information on products and actives. The data base can be sourced through www.apvma.gov.au. The information given in this strategy is provided in good faith and without any liability for loss or damage suffered as a result of its application and use.

Advice given in this strategy is **valid as at 22 June 2018**. All previous versions of this strategy are now invalid.
