

Crop(s): Stone Fruit

Pest(s): Blossom Blight and Brown Rot

Resistance Management Strategy for:

Group 2 (Dicarboximide);
Group 3 (DMI);
Group 7 SDHI (Succinate dehydrogenase inhibitors) and
Group 9 (Anilinopyrimidine) fungicides

1. If applying **Group 2** or **Group 3** fungicides, **DO NOT** apply more than two consecutive sprays of fungicides from the same group before changing to another group.
2. **DO NOT** apply more than three sprays of a **Group 9** fungicide per season. If two or three consecutive sprays are applied, they must be followed by at least the same number of sprays from an alternative chemical group, including from one season to the next.
3. If applying **Group 7** fungicides, **DO NOT** apply more than two consecutive sprays before changing to another group. **DO NOT** apply more than three **Group 7** sprays per season. If consecutive sprays are used, then use the same number of sprays of an alternative group before using another **Group 7**, including sprays in consecutive seasons.
4. A post-harvest treatment should also be counted as an application.
5. The last blossom blight spray and the first pre-harvest brown rot spray should be regarded as consecutive applications.
6. The spray program should be considered and the strategy applied on a whole-orchard basis.
