

Crop(s): Turf

Disease(s): Various

Resistance Management Strategy for:

Group 1	Benzimidazole;
Group 2	Dicarboxamide;
Group 3	Demethylation Inhibitor (DMI);
Group 4	Phenylamides;
Group 7	Succinate Dehydrogenase Inhibitor (SDHI);
Group 7 + 11	SDHI + Quinone outside Inhibitor (QoI);
Group 11	QoI;
Group 11 + 2	QoI + dicarboxamide;
Group 11 + 3	QoI + DMI;
Group 12	Phenylpyrroles;
Group 14	chlorophenyls and nitroanilines;
Group 21	Quinone inside Inhibitor;
Group 28	Carbamate; and
Group 33	Phosphonate.

1. Fungicide groups that are classified as medium to high risk for fungicide resistance development; **Groups 1, 2, 4, 7, 11** and **21** should be rotated as a key feature to reduce the development of resistance.
2. **Do not** apply consecutive sprays of fungicides from the same activity group, unless mixed with a registered fungicide from a different mode of action group with no known resistance.
3. If consecutive sprays are done of fungicides from a high-risk fungicide group (i.e. **Group 1, 2, 4, 7, 11** or **21**) they must be followed by at least the same number of applications of fungicide(s) from a different group(s) before the same high-risk fungicide is used again.

Please note:

This strategy is a guide only and does not endorse particular products, groups of products or cultural methods in terms of their performance. Always follow the product label for specific use instructions. While all effort has been made with the information supplied in this document, no responsibility, actual or implied, is taken for the day to day accuracy of product or active constituent specific information. Readers should check with the Australian Pesticides and Veterinary Medicines Authority's product database for contemporary information on products and actives. The database can be sourced through www.apvma.gov.au. The information given in this strategy is provided in good faith and without any liability for loss or damage suffered as a result of its application and use. Advice given in this strategy is valid as at 10 June 2020. All previous versions of this strategy are now invalid.
