### Further minor use grants announced

Minister Littleproud has announced the details of a further 21 grants totalling \$2 million as part of the 'Access to industry priority uses of agvet chemicals grants program'. Funding for this round of grants was guided by industry collaboration.

This important initiative has delivered significant value to the Australian agricultural sector through the approval of label uses for minor crops and specialty uses. To date 192 grants totalling \$11.86 million have been awarded under the grants program, resulting in 41 new permit uses and eight new label uses for minor use agvet chemicals.

The number of approved grants continues to demonstrate the great need for this funding. CropLife remains a strong advocate for the extension of this crucial program which finishes with this budget cycle.
